

MD MEDICAL EXPANDS THE NETWORK OF MD LAB TESTING POINTS

February 21, 2022 – MD Medical Group, a leading Russian private healthcare provider, announces the opening of the second medical office of the MD Lab laboratory network in the North-Eastern Administrative District of Moscow.

The new laboratory with a total area of 80 sq.m is fully equipped with modern equipment, thanks to which a wide range of diagnostic services is available to patients. All analyzes are processed based on the Lapino-2 multidisciplinary clinical hospital.

In December 2021, the first collection point under the MD Lab brand was launched in the North-Eastern Administrative District of Moscow. The open mini-laboratory shows a good client response, making it easier for patients to access the services of the MDMG medical centres.

MD Medical plans to continue to open new laboratory facilities that provide ample opportunities for basic diagnostics. The company sets itself the task of expanding its presence in densely populated areas of Moscow and the Moscow region and providing as many people as possible with high-quality medical services.

Sergey Arabadzhyan, Director for Development Innovative Technologies at MD Medical, noted:

“The opening of the second medical office of the MD Lab network is part of the company's strategy to make it easier for patients to access high-quality services offered by MD Medical Group. In such megacities as Moscow, where every minute counts, the new format "at home" allows us to always be within the reach of our customers. And that is why MD Lab network will also provide outpatient care to our patients.”
