A WHOLE CITY WAS BORN IN MOTHER AND CHILD GROUP OF COMPANIES

MD Medical Group ("MD Medical Group", "Mother and Child Group" or "the Company"), one of the largest private healthcare companies in Russia, informs that today the 100,000th baby was born at the Group's Avicenna hospital in Novosibirsk.

In Russia, the year 2024 has been declared the Year of the Family, and it is a special joy for us that this very year our family of children born at Mother and Child was enriched with the 100,000th child. Over the 18 years of the Company's operation, an entire city has been born in our hospitals!

The doctors of our medical institutions work every day to increase not only the birth rate of our patients, but also their desire to come back to us for the next child. The Year of the Family is a yearlong professional holiday for us, because every day we help moms and dads, brothers and sisters, grandparents to become happier. It is a great achievement and a great joy for us to have the trust of tens of thousands of families who come to us again and again for their babies.

Director of Avicenna hospital Elena Telina noted:

«Avicenna Maternity Hospital is part of a multidisciplinary hospital, and this allows us to provide comprehensive medical care to pregnant women and women in labor. For us, the main thing in childbirth is the safety and comfort of mother and child, so we use the most modern equipment, innovative techniques, and blood–saving technologies and have the opportunity to provide all the necessary assistance to the newborn. Patients come to us not only from Novosibirsk and the region, but also from other regions. We are happy that it was in our maternity hospital that the 100,000th child of the Mother and Child Group was born.»
