

MD MEDICAL GROUP LAUNCHES MEDICAL CENTRE IN ANAPA

8 August 2024. MD Medical Group IPJSC (“MD Medical”, “MDMG”, “Group” or the “Company”; MOEX: MDMG), a leading Russian private healthcare provider, announces the opening of its new medical centre MD Group Anapa on the premises of the Volleygrad family resort.

The state-of-the-art healthcare facility boasts advanced medical equipment for clinical, diagnostic, and rehabilitation services, and was built in 2024 with no investment made by the Company in its development. The lease agreement for the premises and equipment was signed with the Volleygrad Sports, Training and Recreation Centre, a non-profit organisation.

The two-storey family-oriented medical centre at Volleygrad spans 2,754 sq m and is located on a scenic spit just 300 m from the Vityazevsky estuary and half a kilometre from the Black Sea. The entire complex covers an area of 11 ha. Volleygrad is an all-season family resort and a training base for the Volleyball Academy of the Russian Volleyball Federation. It also hosts various Russian and international competitions. Integrating a medical centre into the resort's extensive recreational and sports infrastructure will enable the Company to provide family-focused medical care in Anapa, a renowned holiday destination for kids. This will also enhance MD Medical's rehabilitation treatment capabilities and solidify its position as a leading private healthcare provider locally.

MD Group Anapa is equipped with unique solutions for musculoskeletal and cardiovascular diagnostics and rehabilitation, as well as a balneotherapy department with six whirlpool baths and massage rooms. Both children and adults already today can access a wide range of outpatient services in areas such as therapy, paediatrics, obstetrics, gynaecology, neurology, and traumatology. Additionally, the centre provides ultrasound, functional diagnostics, and physiotherapy services. Later on, the medical centre will offer an extensive array of diagnostic radiology services, including CT, MRI, X-ray, mammography, and densitometry, utilising advanced equipment from Siemens and General Electric as well as additional outpatient services in surgery, cardiology, endocrinology, otolaryngology, and urology. The medical centre has a total capacity of up to 96,000 appointments per year.

In the future, the Company plans to expand the centre's healthcare offering by establishing IVF and inpatient paediatric care departments.
